SERIOUS INTELLIGENCE ON THE BOMBING CAMPAIGN AGAINST IRAN STARTING THIS WEEKEND AND LASTING FOR TWO WEEKS!!!

On Friday evening, receiving numerous contacts from former colleagues in the Intel Community told me some very serious and bad news. According to SIX separate Intelligence Sources, each in a different area of Intelligence spread between FOUR separate Agencies:

1) President Donald Trump has authorized "far more serious and very far worse strikes upon Iran, beginning THIS WEEKEND. The nature of the strikes will, ALLEGEDLY, "leave the regime of the Islamic Republic with no choice but to surrender."

2) Trump made this decision based on nearly unanimous Intelligence conclusions saying "The IRGC holds complete control over decision-making in Iran. It is in THEIR interests that the conflict drag on because they know the USA is low on precision-strike weapons, the American People are overwhelmingly angry at this war which will harm Trump in the Mid-Term Elections, the fuel supplies in the West are dwindling to dangerously low levels, and dragging-on the conflict will result in severe economic destruction, globally."

3) Waves of air-refueling tankers have been taking off from Middle East locations since about 2:00 PM eastern US time. They have been taking off in Waves of four tankers every ten minutes. Do the math.

4) At 6:30 PM EDT this evening, Iran -- seeing the massive refueling capacity already in the air with more coming and realizing the United States and Israel are planning what would be one of the harshest bombing campaigns to date against energy infrastructure targets in Iran -- issued a statement saying Iran will strike Israel's critical infrastructure and U.S. energy facilities across the region if it is attacked.

5) Iran pointed out that It has already wiped-out HALF of Kuwait's Desalination plants, leaving only four (4) remaining plants. The destruction of the remaining four plants would make Kuwait uninhabitable.

6) "Trump is planning a CATASTROPHIC attack on Iranian energy facilities to force a surrender. The U.S. is preparing a 2-week bombing plan to DESTROY Iran’s electricity to force favorable peace terms."
